

## Gorenje Micro wave **BM300X**

- Type of control                      Electronic
- Clock                                      Yes
- Number of power levels            6
- Turntable                                No
- Turntable diameter                 245 mm
- Cavity material                        Stainless steel
- Automatic programmes            Yes
- Construction type                    Built-in
- Type of micro-wave oven         MW only
- Cavity capacity                        20 l
- Maximum micro-wave power      800 W
- Grill power                              1000 W
- Door opening                         Handle
- Color:                                      VZ065; Brushed stainless steel
- Front screen material                Glass
- Connection Rating                    1250 W
- Voltage                                    230
- Frequency                                50
- Length of electrical supply cord   100 cm
- Plug type                                 Euro
- Net weight                                15,0 Kg
- Gross weight                            17,9 Kg
- Product group                         Microwave oven
- Main colour of product             VZ065; Brushed stainless steel
- Height of the product                388 mm
- Width of the product                 595 mm
- Depth of the product                 345 mm
