Fridge/freezer 588461 NRK612ORAB

USP :

IonAir with MultiFlow 360°

The MultiFlow 360° ventilation system evenly distributes the ionized air through 14 ventilation slots to maintain a constant temperature on every shelf. Air enriched with extra negative ions removes unpleasant odours and mimics a natural microclimate, thus creating the ideal environment for fresh food.

AdaptTech: Adaptive Intelligent System

Adaptive intelligent system monitors, analyzes, and records the use of the refrigerator in weekly intervals. Then, its operation, especially maintaining of the set temperature and the resulting power consumption are adjusted to the identified pattern. When the door is opened, the temperature of the food will not rise as it does in conventional refrigerators; this will hinder the development of bacteria.

CrispZone with HumidityControl

One of the largest fruit and vegetables bins in the market, CrispZone extends the freshness of your produce with a low temperature and the option to adjust the humidity.

FreshZone drawer

The drawer with the lowest temperature in the refrigerator is ideal for storing meat, fish, fruit, and vegetables. It will preserve the food's freshness, aroma, colour, and flavour for much longer.
