| SensoCARE | Cotton and synthetic fibre programmes can be tweaked with extra modes. AllergyCare uses more water and extra rinse cycles, TimeCare reduces the washing time and EcoCare is the most energy-efficient washing mode. |
| ECOSystem | The system prevents loss of detergent during water supply. This reduces the use of detergent by up to 20% and thus also reduces the impact on the environment. |
| Automatic recognition of laundry weight TotalWeight | The sensor adjusts all washing parameters to the amount of laundry in the drum. This leads to optimum use of water and power, shorter wash, and considerably quieter operation. A full basket of laundry, no matter how large, will be clean and pleasantly smelling. |
| Durable heater DuraHeat | The redesigned and improved heater includes an overheating protection system. This extends its useful life and makes washing machine operation safer. |
| Lockable control panel | During the wash, the door stays locked, preventing even the most inquisitive child from opening it. For added protection, the control panel can be locked by pressing a special combination of keys, making it impossible to inadvertently change the settings. |
| Self cleaning program SterilTub | This programme makes sure the washing machine interior stays perfectly clean and sterile, allowing a pleasant smell of the laundry. Washing with washing powder at lower temperatures may lead to ideal conditions for development of bacteria which in turn could cause a foul smell of your laundry. The SterilTub works with the drum empty and eliminates any bacteria from the machine interior. |
| StableTech side panels | Increased stability and significantly reduced vibrations thanks to new StableTech side panels and bottom of SensoCare washing machines results in significantly decreased noise level even at highest spin speeds. |
| Audio signal SoftSound | In addition to exquisite design, Gorenje washing machines feature a pleasing sound. Beeps and high quality speakers make use of a washing machine even more enjoyable. Particular attention is given to programs and motion selector function buttons, detergent dispenser and the door. |
