Fridge/freezer 733684 NRK612SYW4

USP :

IonAir with MultiFlow 360°

The MultiFlow 360° ventilation system evenly distributes the ionized air through 14 ventilation slots to maintain a constant temperature on every shelf. Air enriched with extra negative ions removes unpleasant odours and mimics a natural microclimate to create the ideal environment for fresh food.

AdaptTech: Adaptive Intelligent System

Adaptive intelligent system monitors, analyzes, and records the use of the refrigerator in weekly intervals. Then, its operation, especially maintaining of the set temperature and the resulting power consumption are adjusted to the identified pattern. When the door is opened, the temperature of the food will not rise as it does in conventional refrigerators; this will hinder the development of bacteria.

NoFrost Plus

One of the best cooling systems in the market, installed in the freezer compartment, prevents the accumulation of ice and frost to keep the power consumption low. As a result, the usage of the storage capacity is optimal, and defrosting and cleaning of the interior are no longer necessary. Packages or pieces of frozen food will not stick to each other, keeping your food in the freezer neat and tidy.

CrispZone with HumidityControl

CrispZone with HumidityControl is one of the more spacious fruit and vegetable bins in the market, designed to keep your produce fresh through low temperature and the option to adjust the humidity level.

FreshZone drawer

This drawer is ideal for storing meat, fish, and seafood. The temperature is a bit lower than in the remaining part of the refrigerator compartment, which considerably extends its freshness.

XXL SpaceBox drawer

This freezer compartment drawer is the largest in the appliance and it is ideal for storing large items like a turkey, several pizzas, or even cakes.
