

Combine zones with the Bridge function to get more cooking space

The Bridge 600

induction hob combines two separate zones to create one larger cooking surface. With temperature and time settings automatically aligned, you have the ideal conditions for cooking on the plancha, on the tray or on the Himalayan salt plate.

Benefits & features

Combine zones for more cooking space with the Bridge function

The Bridge function allows you to combine two separate cooking zones to create one large surface. With the temperature and duration settings automatically aligned, you have ideal conditions to cook steaks to perfection on the Plancha plate or in the pan.

Auto-sizing zones for several types of cookware

Auto-sizing cooking zones adapt to the size of the dishes as soon as they are covered. The zones offer total coverage, depending on the size of the vessel (according to the instructions and within the dimensions of the user manual), ensuring heat without any loss of

Hob2Hood® for more comfort

The Hob2Hood® function connects the hob and hood via a wireless connection. Start cooking and the hood will be controlled automatically, depending on the hob settings, for a kitchen as fresh as possible. Concentrate on cooking and forget about hood care.

- Hob type: Induction • Hob with beveled edge frame • Positioning of control buttons: Front, right • Lighting control
- induction zones • Induction cooking zones with power increase function
- Pan detection
- Bridge function • Automatic rapid heating • Function control panel lock • Child safety function • Hob safety: Automatic shutdown • Acoustic signal with the option to deactivate • Timer
- EcoTimer™
- Timer
- Digital indicators for all cooking zones • CleverHeat™ function
- Easy installation thanks to the "snap-in" • Color: black • Color of ceramic glass: Black • Top cut-out size - radius (mm): 5

Touch control for each cooking zone Easily adjust the temperature settings of the hob with direct touch controls. Each cooking zone has an individual control panel so you always know what the heat settings are. In addition, thanks to the smooth and uniform surface, the hob is much easier to clean.

Intense heat with PowerBoost

Activate PowerBoost and you'll have extra power in an instant. The function is ideal for dishes that cook quickly or for times when you are on the run.
