

Combine zones with the Bridge function to get more cooking space

The Bridge 600

induction hob combines two separate zones to create one larger cooking surface. With temperature and time settings automatically aligned, you have the ideal conditions for cooking on the plancha, on the tray or on the Himalayan salt plate.

Benefits & features

TripleBridge – more freedom with combined cooking zones The TripleBridge function offers more freedom and flexibility in the kitchen. Now you can use various cookware together, such as plancha grills or roasting pans, by combining two cooking zones on three different hob surfaces.

- Hob type: Induction • Hob with beveled edge frame • Digital controls • Positioning of control buttons: Front left-right-center • Lighting control • induction zones • Induction cooking zones with power increase function • Dish detection • Bridge function • Fast automatic heating • Control panel lock function • Child safety function • Hot plate safety: Automatic shutdown • Acoustic signal with option to

Auto-sizing zones for several types of cookware

Auto-sizing cooking zones adapt to the size of the dishes as soon as they are covered. The zones offer total coverage, depending on the size of the vessel (according to the instructions and within the dimensions of the user manual), ensuring heat without any loss of

Hob2Hood® for more comfort

The Hob2Hood® function connects the hob and hood via a wireless connection. Start cooking and the hood will be controlled automatically, depending on the hob settings, for a kitchen as fresh as possible. Concentrate on cooking and forget about hood care.

- deactivate • Timer • EcoTimer™ • Timer • CleverHeat™ function • Easy installation thanks to the "snap-in" system • Color: black • Color of ceramic glass: Black • Top cut-out size - radius (mm): 5

Direct Access - quick control

Direct Access controls allow instant adjustment of the heat level of the hob. One touch is required to set the temperature. For instant, effortless control.

Intense heat with PowerBoost

Activate PowerBoost and you'll have extra power in an instant. The function is ideal for dishes that cook quickly or for times when you are on the run.
